Technical Rider Rampenlichter 2027

- Stage: 12 x 8 m with black dance floor; black masking on three sides. The masking on the right and left sides of the stage is mounted on curtain tracks and can quickly be converted to a white wall. The backdrop is motorized and can be removed in approximately 10 minutes. A white rear wall is therefore also possible.

- Three stage entrances on each side (front, center, rear).

- Six mobile Bütec scissor platforms (height 20-100 cm).

- Lighting: 48 circuits at 2 kW, MA Lighting grandMA3 Tourpack lighting console, hazer. All other fixture types can be found in the lighting plan.

- Video: 1 permanently installed Panasonic PT-DT110 video projector (10,000 ANSI lumens) in the rig, 2 mobile video projectors (7,000 ANSI lumens). Playback via Mac Mini at the control position is possible.

- Video sound available: yes.

- Internet access: by arrangement.

- Projection on AV Stumpfl framed screen, 4.60 x 2.70 m, 16:9 (removable).

- Black and white stage backgrounds are possible.

- Sound: TW Audio sound system, Allen & Heath SQ5, Dante network.

- 4x Sennheiser wireless systems, each with 1 handheld transmitter and 1 bodypack transmitter; SM58/57 microphones with stands. Headsets available upon prior arrangement.

- Other: The stage floor must not be entered with street shoes and must be treated with care. Nothing may be attached to the floor. Rigging from the ceiling is possible at designated points but requires prior consultation.

- **Open flames and fire-hazardous activities such as candles, smoke effects, and pyrotechnics are not permitted. All decorations must be flame-retardant (B1).**
